Document outlining where the features are to be found

1. 4 or more sections, with one of the sections having at least one
sub page.

Please see index.html:25~40, where the navigation contains 6 pages
and within the page of "UI UX", 3 subpages.

2. A simple form (with at least one HTML5 features)

Please see contact.html:48~77, most of the inputs are "required" as
a html5 feature.
"input type="email" is another html5 feature.

3. Search engine optimized and semantic code

Through out the pages, I have put meta tag of keywords, description,
and author in the head and also featured every img tag with an "alt"
description.

4. Files upload to a production server with a working link provided

Please link to http://www.anniekwhsu.com/index.html
I bought my domain at https://www.nearlyfreespeech.net/
But not yet know how to enable HTTPS(SSL) for the website.

5. A simple javascript or jquery enhancement

I use the fotoroma plug in to make the slide show in home, branding,
illustration, and photo editing page.
http://fotorama.io/

index.html: 44~56
branding.html: 48~58
illustration.html: 49~58
photoediting.html: 48~56
